Change Argos / Nautilus 2 GSM

Until today, panel cards needed to be unlocked to activate the GSM function on Argos / Nautilus 2. To make it easier, we now have divided the front panel cards so that you can easily order with or without GSM function.

The two different cards can be ordered at:

691781 - Argos front panel card without GSM function.

691782 - Argos front panel card with GSM function.

If you have spare parts cards in stock, it is of great importance that you ensure that these are unlocked before installation on a farm with GSM function.

The new articles are available for purchase on our webshop, see links below.

Without GSM:

<https://webshop-wedholms.com/en/control-system-spare-parts/wedholms/argos/front-printed-circuit-argos-excl-gsm-1>

With GSM:
