

# Service News 2022 / Nr. 2

## New software and instruction manual Argos / Nautilus 2

We are happy to announce that we have launched new software versions for Argos / Nautilus 2 and Navigator. In addition to bug fixes, the software update also offers some new functions for cooling and cleaning, as well as the possibility of connection via network cable (Ethernet) to Milk Tank Manager for monitoring and control of the tank from distance.

- News for cooling: B11 and B12.
- News for cleaning: D27, D28, D29, D30, D31, D32 and D33.
- News for connection to Milk Tank Manager: Just connect the tank to the farm network via Ethernet cable and activate the option Milk Tank Manager. No SIM card needed.

All tanks / silos delivered after date 2022-04-11 will have the new software.

The updated instruction manual for Argos / Nautilus 2 is included with the tank or silo upon delivery.

The manual is also available on the dealer area of our homepage. There you can even find the new software versions for Argos / Nautilus 2 and Navigator. Note that registration is necessary to access the dealer area. Register today to grant your access to all important documents and latest software for Wedholms and Lely Nautilus milk cooling tanks and silos.
